

New Copy Asset Panel

- ❑ GTA just rolled out a new copy asset process this week.
- ❑ This process will save the agencies much time when adding multiple assets that are essentially identical.
- ❑ This process will be applicable for agencies that express add everything OR an agency that missed the opportunity to unitize in the interface.

Navigation

- Navigational path is:
- GO, MANANGE ASSETS, MANAGE ASSETS
- USE, COPY ASSET, ASSET COPY
- Note: If the menu item is not present, your security may need to be changed.

- ❑ Click the “Edit Trans Info” button if the Trans Date or Acct Date need to be changed.
- ❑ NOTE: The Trans Date will populate the in-service date but NOT the acquisition date.
- ❑ NOTE: Acct Date must always be the current open period. Most of the time the default is fine, but at fiscal year end (State or Federal) you may need to adjust the date.

- In our example we have a total of 50 Dell Computers that must be keyed in the AM module.
- The first was express added so we need 49 more.
- It is understood that the panel will copy the first, but we need to key 48 additional copies.
- Our Total Copies will equal 49.

- ❑ Now is the opportunity to key in the tag numbers and serial numbers OR they can be keyed later after the save.
- ❑ You could change chartfields, quantity, or amount, but it is highly discouraged. You would need to change these fields on both books per asset.
- ❑ Press the save button.

Process Completed

- ❑ Make a note of the asset's number range. Notice the first and last asset ID numbers. They will be sequential.
- ❑ You may now make ANY changes that are needed in the "Asset Basic Information" panels. They are only "physical" in nature.
- ❑ Avoid making any changes in other panels that are "financial" in nature for one day. The over night calc must take place first.

Process Completed

- The copied assets will have the location and custodian information from the original asset. They can be changed in asset basic information. The acquisition date can also be changed if needed.

Identifying PO and Voucher Information.

- If an agency wants, they may key PO and voucher information to assets that have been express added. Interfaced assets already have this info.
- The “Acquisition Detail 2” panel under “Asset Basic Information” is the location for this data.
- Many queries that look for PO and voucher data look here.
- The PO # is also on the “General Info 1” tab.

Life to Date vs. Remaining Value

- Life to Date and Remaining Value impact depreciation for cost adjustments.
- Life to Date will factor in the “Cost Adjustment” back to the in service date and figure out what depreciation should have been. A prior period depreciation entry will take place at the end of the month.
- Remaining Value will factor in the “Cost Adjustment” back to the transaction date of the adjustment.

Reconciliation

- Procedures are located on the Phoenix website.
- The reconciliation is split into two main sections.
- Part I works to reconcile any PO/AP payments that fall into the inventory range of accounts with the “ACTUALS” ledger. It will also bring to light any payments that were not flagged to go to AM.
 - Note: Purchasing cards sometimes need to be scrutinized for asset purchases.

Reconciliation

- Part II works to reconcile any Assets in the AM module to the GFAAG or GAAPACTUALS ledger.
 - Proprietary agencies book to the GAAPACTUALS.
 - Governmental agencies book to the GFAAG.
 - This is determined by profile selection.
- Part I of the reconciliation focuses on expense accounts.
- Part II of the reconciliation focuses on asset accounts.
- Part I of the reconciliation insures that items are inventoried.
- Part II of the reconciliation insures that assets valued 5K or greater are capitalized and update the appropriate ledger.

Reconciliation

- Assets with an acquisition cost of 1K up to 5K must be inventoried.
- Assets (generally) with an acquisition cost of 5K or greater must be inventoried, capitalized, and depreciated.
- Exceptions to the 5K capitalize rule are:
 - Buildings, Improvements, Library Collections @ 100K
 - Software, Infrastructure @ \$1,000,000
 - Land, Works of Art/ Historical Treasures....Capitalize ALL
- Some profiles never depreciate like LAND even though they are capitalized (all driven by the profile).

Other Resources

- ❑ An excellent source of AM information is the “State of Georgia Capital Asset Guide” located on the Department of Audits’ website.
- ❑ The guide is about a 20 page section located in the accounting procedures manual.

Questions?

- This presentation will be available on the GTA Phoenix website.
- <http://phoenix.gagta.com>
- Help desk number is 1-888-896-7771 or 404-657-3956
- Direct number is 404-463-8664 (Will change soon)
